## **A Review to Copyright-Related Provisions in the Bill of the Act for the Development of Digital Content Industry**

Chung-Hsin Chang

### Abstract

A bill concerning the act for the development of digital content industry, draft by Technology Law Center of Institute of Information Industry, is introduced by the Industry Bureau, MOE. The Industry Bureau is collecting the public suggestions and consulting with other agencies. A formal draft is expected to submit to Legislative Yuan by the Executive Yuan in the near time. Among other things, there are several issues concerning copyright in the bill, such as registration of copyright mortgage, the exploitation of orphan works, statutory license of articles in periodicals, protection of database, infringement liability of ISP. This Article strongly objects the approach to address those issues in the bill other than in Copyright law. In addition, it analyses all the provisions concerning copyright with their backgrounds, comparison of international legal regime. Finally, it submits some suggestions for further discussion and raising concerns by the public.

**Keywords:** digital content, copyright, fair use, statutory license, ISP, orphan works, database
